SCOREBOARDS

Large format display systems for installation above casting platforms

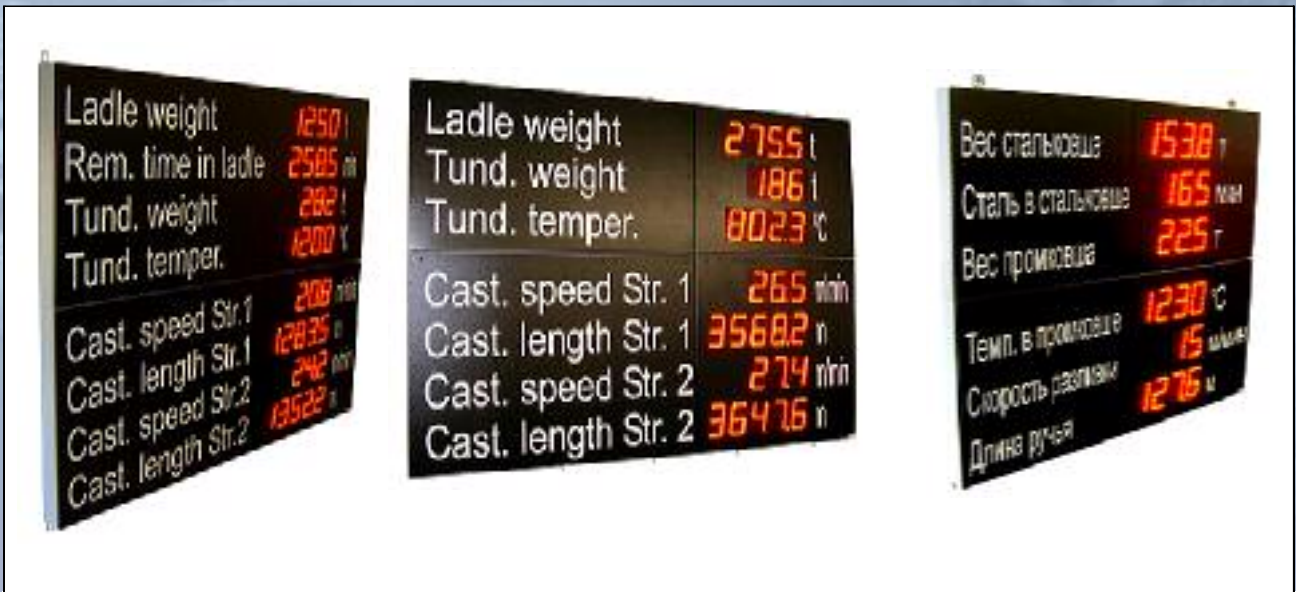

Our modular designed large display systems are used successfully as Scoreboards in the steel industry as well as in foundries. Here our Scoreboards are installed above the casting platform. Customized requirements in hard and software can be considered by the modular structure of our large-scale indicators at any time without any problems.

KONZEPTION

- Designed for rough 24/7 operation
- Robust industrial cabinet
- Protection class IP65
- Modular Concept, individual design
- Digit height 25 mm (readable up to 10m) ... 500 mm (readable up to 200m)
- Long term Service & Support

VISUALIZATION

- | | |
|---|---|
| <input checked="" type="checkbox"/> Ladle weight (tons) | <input checked="" type="checkbox"/> Tundish weight (tons) |
| <input checked="" type="checkbox"/> Ladle temperature (°C) | <input checked="" type="checkbox"/> Tundish temperature (°C) |
| <input checked="" type="checkbox"/> Cast speed (m/min) | <input checked="" type="checkbox"/> Cast speed (m/min) |
| <input checked="" type="checkbox"/> Cast length (m) | <input checked="" type="checkbox"/> Remaining time in ladle (min) |
| <input checked="" type="checkbox"/> Rest length (m) | <input checked="" type="checkbox"/> Ton cast from particular ladle (tons) |
| <input checked="" type="checkbox"/> Next heat location | <input checked="" type="checkbox"/> Sulphur content |
| <input checked="" type="checkbox"/> Heat number within sequence | <input checked="" type="checkbox"/> Steel Grade |

Our Scoreboards are intelligent man machine interfaces providing vital information about all processrelated data. Available in variety of visualization data, data interfaces and numerical or alphanumerical.

There virtually is no limit as to the number of lines, columns, figures or letters. The systems can be easily integrated into any industrial environment.
